1. The following is an examiner's statement of reasons for allowance: the prior art fails to show or fairly suggest a method for generating a representation of a particular signal among video signals representing a display, the signals including a first component having a first bandwidth and a second component having a smaller second bandwidth, having the combinations as claimed, including the steps of measuring first samples of the first component outside the second bandwidth for an interval in each signal, measuring second samples of the second component inside the second bandwidth for the interval, establishing factors based upon first samples, establishing filter modes based upon second samples, establishing a correlation between factors and filter modes, filtering the signals using a selected filter mode, identifying a selected factor according to the correlation for the selected filter mode, employing the selected factor for weighted mixing of the samples to generate the representation for the time interval and repeating the above steps until the representation is completed, as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sherrie Hsia whose telephone number is (571) 272-7347.
